VINEYARDS

The grapes used come from our vineyard situated in Tupungato, Mendoza at over 1300 m.a.s.l. (4300 feet). This region is characterized by its wide temperature ranges allowing for the production of grapes with very intense colors and flavors. Ideal to elaborate naturally concentrated wines which are suitable for aging. Our vineyards are equipped with a drip-irrigation system that allows us to adjust and supply the exact amount of water that plants require. Canopy management is performed in order to obtain a yield of less than 10.000 kg per hectare. Clusters generally carry small-sized berries, and have adequate exposure to the sun in order to preserve the aromatic characteristics.
